

Is your Business Continuity Plan **S.E.C.U.R.E.D?**

Work from home unable to obtain resource from office and limits business continuity

Unable to provide consistent security posture while users work from home

No visibility and control over possible data leakage

What the solution offers:

OPTIMIZE

This solution ensures that the **tunnel is encrypted** as you move data from one point to another. It can be configured such that your user is forced to access external sites or a public cloud via the office network - **optimizing your company's existing office network/ security set up.**

CONTROL

This solution enables you to achieve **Role Base Access Control**, providing application access to only rightful users.

2-Factor Authentication, for secure access.

This solution enables you to get visibility into your company's web traffic to **track and address**, and also your user's application to **track and control**.

PREVENT

This solution enables you to **block** users from accessing websites/ links that are malicious and **prevent** DATA from being exfiltrated and alert your administrator.

PCBS Home Office Solution

安全與存取方便

由於外在環境不明朗因素，不少企業選擇容許員工以 **home office** 方式在家工作。然而在作出此決定前，必需考慮到公司網絡的安全，避免資料外洩；同時也要顧及一般員工可能並不熟識 IT，所以需要方便使用。幸好以上的顧慮可以透過 **PCBS** 融合科技提供的解決方案，讓企業在安全與方便之間取得合理的平衡。

過往每當提到安全的遠端存取，通常都會想到通過 **VPN** 加密，然而單靠一條密碼進行登入雖然方便但安全性偏低，只採用密碼的身份驗證可能會導致安全漏洞、惡意軟體感染和原則違規事件。當牽涉到從遠端存取企業內部資料時，就要更加審慎處理。

PCBS 專為客戶提供一套解決方案，應用 **Mobile Token (FortiToken)** 一次性密碼權杖融合 **VPN** 加密技術，在使用雙因素身份驗證時，會使用密碼以及安全權杖和身份驗證伺服器來提供更好的安全防護，以支援企業需要增強式身份驗證的環境，提升作為網絡大門的保安程度。**PCBS Home Office Solution** 提供相宜價格、易於實施的使用設定，從筆記型電腦到手機，獲授權的員工才可使用各種裝置安全地存取公司資源。

遙控活動受監察及記錄

如果有必要，IT 管理員可以從記錄中查看遠端遙控時進行過的活動，同時保障公司和同事。
